Case counts include the number of disease reports received throughout the month of December 2024 with the exclusion of COVID-19. COVID-19 case data is pulled by event date (onset date OR specimen collection date, whichever is earliest). Disease and Case Inclusion Criteria: Suspect, Probable, and Confirmed.

Key Finding Comparisons/Special Notes

- 11% of COVID cases were hospitalized. There were two (2) COVID deaths.
- **1 COVID-19 outbreak** was reported in a long-term care facility.
- **2 viral Gastrointestinal Illness (GI) outbreaks** were investigated in separate long-term care facilities. Clinical samples from one facility confirmed Norovirus as the causative agent.
- **1 Campylobacter outbreak was reported and investigated**, with raw milk consumption identified as the likely cause.
- Attached is the Influenza Surveillance Summary for MMWR Weeks 49-52.
- LTCFs, Physicians, and Schools can visit our website to report weekly flu surveillance numbers.
