Case counts include the number of disease reports received throughout the month of September 2024 with the exclusion of COVID-19. COVID-19 case data is pulled by event date (onset date OR specimen collection date, whichever is earliest). Disease and Case Inclusion Criteria: Suspect, Probable, and Confirmed.

Key Finding Comparisons/Special Notes

- 4.6% of COVID cases were hospitalized.
- There were three new COVID (long term care facility) outbreaks reported in September.
- Salmonellosis serotypes include Agbeni and Enteritidis.
- Influenza reporting links were emailed and faxed to providers, LTCF's and school districts on 9/24/2024 for the 2024-25 season. Please visit our website to report weekly flu numbers.
